Education

Virginia Tech, BS in Industrial and Systems Engineering; Minor in Computer Science — Jan 2025 – May 2028

- GPA: 3.6/4.0

Experience

Independent Product Designer & Developer | Remote — May. 2026 – Present

- Designed and developed user-centered digital experiences using **Figma, Claude Code, and AI-assisted development**, translating complex user needs into intuitive, responsive interfaces
- Created wireframes, high-fidelity mockups, interactive prototypes, and reusable UI components, applying **human-centered design principles** to improve usability, accessibility, and visual consistency.
- Leveraged **Claude Code and generative AI** to accelerate frontend development, streamline design-to-code workflows, and rapidly iterate on product features.

AI Engineer Intern , Handshake AI—Remote — Jan. 2026 – May. 2026

- Assisted in training and evaluating AI models by analyzing model outputs, improving response accuracy, and supporting AI-driven workflow optimization
- Applied Python and prompt engineering techniques to organize datasets, automate repetitive processes, and enhance large language model performance
- Collaborated weekly with engineers and research teams to test AI-assisted systems, document findings, and ensure project objectives and development milestones were completed on time

NSBE Program Chair, Virginia Tech—Blacksburg, VA — Jan. 2026 – Present

- Planned and coordinated academic, professional development, and networking programs for NSBE members
- Organized workshops, speaker events, and career-focused initiatives connecting engineering students with industry professionals.
- Led initiatives focused on increasing member engagement, technical development, and career readiness among engineering students

Projects

Clarity AI | AI-Powered Research & Knowledge Management Platform - Product Design — Jun. 2026 – Present

- Designed an AI-powered research platform to streamline academic research, source organization, and information synthesis through intuitive, user-centered interfaces
- Leveraged **Claude Code, Figma, and AI-assisted development** to prototype responsive interfaces, accelerate frontend development, and build intelligent research workflows
- Developed concepts for AI-powered document analysis, automated citation management, and contextual search to improve information accessibility and research efficiency

TransitFlow | AI-Powered Transit Navigation Platform - Product design — Jun. 2026 – Present

- Designed an intelligent transit navigation platform focused on optimizing route planning, accessibility, and the overall commuter experience through human-centered product design
- Utilized **Claude Code, Figma, and generative AI** to prototype interactive interfaces, accelerate frontend development, and create responsive, accessible navigation experiences.
- Developed concepts for AI-assisted route recommendations, real-time transit visualization, and personalized journey planning to simplify transportation decisions and improve usability

Technologies and Skills

Technologies: ,Microsoft SQL Server, Autocad, Matplotlib, Git, Python, Sql, Java, Claude Code, Figma
Skills: Claude Code, Figma, Generative AI, AI-Assisted Development, UI/UX Design, Interactive Prototyping, Prompt Engineering, Responsive Web Design, Product Design, User Research
